SUBJECT INDEX

A

- Abuse
 - childhood sexual
 - impact on psychological well-being and practice of nurses, 137-145
 - inquiring about as part of nursing history, 146-151
 - substance
 - improving nurses' responses toward substance-misusing patients, 286-294
- Acculturation
 - intergenerational conflict in Cuban and Haitian immigrant families, 354-364
- Acquired immunodeficiency syndrome (AIDS)
 - interpersonal support among 8-year-old girls who have lost parents or siblings to, 92-98
- Adolescent depression
 - review of literature, 45-55
 - definitions, 45
 - nursing assessment, 49-50
 - nursing diagnoses, 50-51
 - prevalence, 45-46
 - related variables, 48-49
 - research implications, 51-52
 - theoretical approaches, 46-48
- Adult children
 - chronic sorrow in parents of chronically mentally ill, 77-84
 - family experience with positive response to clozapine, 11-21
- Advocacy, *see* Protection and advocacy programs
- Aggression
 - improving staff safety with program to manage, 211-215
 - managing violence without coercion, 203-210
- Aging
 - critical review of research on cognitive impairment in older adults, 22-33
- Agitation
 - measurement, management, and intervention research, 251-260
 - research agenda for future studies on, 255-256
- AIDS, *see* Acquired immunodeficiency syndrome
- Alcohol misuse/abuse
 - improving nurses' responses toward patients', 286-294
- Alzheimer's disease
 - communicating with persons with, 279-285
 - uncovering and managing caregiver denial during research process, 62-67
- Antidepressant agents
 - dimensions of response to in bulimia nervosa, 111-121
- Anxiety
 - pedagogy of in clinical supervision model, 3-10
- Art act
 - integrating esthetics into nursing, 369-370
- Assessment, clinical
 - the last well family, 1-2
- Assistive technology
 - protection and advocacy for, 234-235

- Attributional style
 - in interactional model of suicide behaviors, 158-168

B

- Bibliotherapy support group
 - for 8-year-old girls who have lost parents or siblings to AIDS, 92-98
- Biologic psychiatry
 - in psychiatric nursing, 216-224
 - biology of mental illness, 217-220
 - biology of the immune system, 220-221
- Bipolar disorder
 - chronic sorrow in parents of adult children with chronic, 77-84
 - striving for stability despite barriers, 122-129
- Boundaries, 109-110
- Bowen's family systems theory
 - family experience with client's positive response to clozapine, 11-21
 - in clinical supervision model, 3-10
- Bulimia nervosa
 - dimensions of response to antidepressant agents in, 111-121

C

- Caregivers
 - chronic sorrow of parents of chronically mentally ill adult children, 77-84
 - communication with persons with Alzheimer's disease by formal, 279-285
 - uncovering and managing denial by in Alzheimer's disease research, 62-67
- Child rearing
 - intergenerational conflict in Cuban and Haitian immigrant families, 354-364
- Childhood sexual abuse
 - impact on nurses' psychological well-being and practice, 137-145
 - inquiring about as part of nursing history, 146-151
- Children
 - adult, *see* Adult children
 - interpersonal support among 8-year-old girls who have lost parents or siblings to AIDS, 92-98
- Chronic mental illness
 - chronic sorrow in parents of adult children with, 77-84
- Client Assistance Program
 - and protection and advocacy, 233-234
- Clients
 - uniqueness within nurse-client relationship, 34-39
 - see also* Patients
- Clinical nurse specialists

- clinical outcomes and satisfaction of patients of, 240-250
- collaborative practice model with physician, 332-337
- Clinical outcomes
 - and satisfaction of patients of clinical nurse specialists, 240-250
 - see also* Outcomes, patient
- Clinical practice
 - childhood sexual abuse and nurses' psychological well-being and, 137-145
- Clinical supervision, for psychotherapy
 - three-way mirror model for, 3-10
 - examples of, 6-8
 - pedagogy of anxiety, 5-6
 - reflexive coherence, 4-5
 - system parallel reflection, 3-4
- Clozapine
 - family experience with positive client response to, 11-21
 - CNS, *see* Clinical nurse specialists
- Cognitive function
 - critical review of research on impairment in older adults, 22-33
- Cognitive impairment
 - critical review of research on in older adults, 22-33
- Cognitive rigidity
 - cognitive rigidity/stress-diathesis-hopelessness model of suicidal behavior, 161-162
 - in interactional model of suicidal behaviors, 158-168
- Collaboration
 - CNS-MD model for quality, cost-effective psychiatric treatment, 332-337
 - managing violence without coercion, 203-210
- Communication
 - by family and formal caregivers with Alzheimer's patients, 279-285
- Concept synthesis
 - of disturbing behaviors in demented elderly, 188-194
 - clustering, 188-189
 - compatibility with existing theory, 191-193
 - labeling, 189
 - verifying, 189-191
- Continuing education
 - improving nurses' responses toward substance-misusing patients, 286-294
- Coping
 - denial by Alzheimer's disease caregivers in nursing research process, 62-67
- Cost of care issues
 - CNS-MD collaborative practice model for psychiatric treatment, 332-337
- Cuban immigrants
 - intergenerational conflict in immigrant families, 354-364
- Cure
 - when is the patient cured?, 171-172

D

- Dementia
 - concept synthesis of disturbing behaviors in demented elderly, 188-194

- Denial
 - as barrier to stability in bipolar disorder, 122-129
 - uncovering and managing during research process, 62-67
- Depression
 - adolescent, review of literature, 45-55
 - health-seeking resources in depressed outpatients, 179-187
 - in interactional model of suicidal behaviors, 158-168
 - neurobiology of in late life, 130-136
 - suicide risk in, 227-228
 - symptoms of among female nursing students, 269-278
- Developmental disabilities
 - protection and advocacy for persons with, 233
- Dignity
 - in protection and advocacy programs, 235-236
- Distress
 - in self-detection of schizophrenic relapse, 261-268
- Disturbing behaviors
 - use of concept synthesis for in demented elderly, 188-194
- Drugs, misuse and abuse of
 - improving nurses' responses toward substance-misusing patients, 286-294
- Drugs, pharmaceutical
 - family experience with positive client response to clozapine, 11-21
 - response to antidepressant agents in bulimia nervosa, 111-121

E

- Eating disorders
 - response to antidepressant agents in bulimia nervosa, 111-121
- Education, nursing
 - South African perspective on preparing nurses for primary psychiatric care, 348-353
 - teaching about protection and advocacy programs, 237
 - use of literature to integrate esthetics into, 367-369
 - see also* Continuing education
- Elderly patients
 - agitation in, 251-260
 - communicating with persons with Alzheimer's disease, 279-285
 - critical review of research on cognitive impairment in, 22-33
 - disturbing behaviors in demented, 188-194
 - failure to thrive in, 99-105
 - neurobiology of depression in, 130-136
 - perceptions of role of group psychotherapy in fostering self-transcendence, 338-347
- Empowerment
 - in protection and advocacy programs, 235-236
- Esthetics
 - integrating into nursing through literature, 365-372
 - art as an end, 369-370
 - literature in nursing education, 367-369
 - what is esthetics?, 366-367
 - why bother with esthetics?, 365-366
- Ethical issues
 - use of outcomes for resource allocation in managed care, 173-178

F

- Failure to thrive
 - silent epidemic in elderly, 99-105
 - assessment, 103
 - case studies, 100-103
 - intervention, 103-104
 - review of literature on, 99-100
- Family therapy
 - intergenerational conflict in Cuban and Haitian immigrant families, 354-364
 - the last well family, 1-2
- Family(ies), of clients/patients
 - chronic sorrow in parents of chronically mentally ill adult children, 77-84
 - communication with persons with Alzheimer's disease by, 279-285
 - experience with positive client response to clozapine, 11-21
- Functional ability
 - in research on cognitive impairment in older adults, 24-25

G

- Geropsychiatric nursing
 - failure to thrive, 99-105
 - uncovering and managing denial during research process in, 62-67
 - see also* Elderly patients
- Girls
 - interpersonal support among 8-year-olds who have lost parents or siblings to AIDS, 92-98
- Grand theories, of nursing
 - Rogers' in conjunction with Peplau's middle-range theory, 40-44
- Grief
 - chronic sorrow in parents of chronically mentally ill adult children, 77-84
- Group therapy
 - elders' perceptions of role of in fostering self-transcendence, 338-347
 - for 8-year-old girls who have lost parents or siblings to AIDS, 92-98

H

- Haitian immigrants
 - intergenerational conflict in immigrant families, 354-364
- Health care reform
 - clinical outcomes and satisfaction of patients of clinical nurse specialists, 240-250
 - ethics of use of outcomes for resource allocation in managed care, 173-178
 - keeping mental health systems humane under managed care, 309-310
 - role of psychiatric nurses in, 231-232

- Health insurance, *see* Insurance, health
- Health-seeking resources
 - in depressed outpatients, 179-187
- History, nursing
 - inquiring about childhood sexual abuse as part of, 146-151
- Homeless people
 - transitional residential program for mentally ill, 152-157
- Hopelessness
 - in interactional model of suicidal behaviors, 158-168

I

- Immigrants, to United States
 - intergenerational conflict in Cuban and Haitian families, 354-364
- Immune system
 - biology of, 220-221
- Individual rights
 - protection and advocacy for, 234-235
- Information processing
 - in research on cognitive impairment in older adults, 22-33
- Information search
 - by people hospitalized with bipolar disorder, 122-129
- Insurance, health
 - limits on coverage for mental health services, 171-172
- Integrity
 - in Rogers' and Peplau's theories of nursing, 43
- Intelligence
 - in research on cognitive impairment in older adults, 25
- Interactional model
 - of suicidal behaviors, 158-168
- Interpersonal support
 - among 8-year-old girls who have lost parents or siblings to AIDS, 92-98

L

- Language
 - in research on cognitive impairment in older adults, 25
- Learning ability
 - in research on cognitive impairment in older adults, 25-26
- Literature
 - integrating esthetics into nursing using, 365-372

M

- Managed care
 - ethical cautions is use of outcomes for resource allocation, 173-178
 - keeping mental health systems humane under, 309-310
 - limits on mental health services in, 171-172
 - role of psychiatric nurses in, 231-232
- MDs, *see* Physicians
- Meetings, multidisciplinary team
 - critical reappraisal of in psychiatric care settings, 85-91

- Memory
 - in research on cognitive impairment in older adults, 26
- Menstrual cycle
 - and depression in female nursing students, 269-278
- Mental illness
 - biology of, 217-220
 - neurobiology of depression and late life, 130-136
 - protection and advocacy for persons with, 234
 - when is the patient cured, 171-172
- Middle-range theories, of nursing
 - Peplau's in conjunction with Rogers' grand theory, 40-44
- Multidisciplinary team meetings
 - critical reappraisal of in psychiatric care settings, 85-91
 - alternative research agendas, 89-90
 - framework for analysis, 85-86
 - images of meetings, 87-89
 - radical re-visioning and restructuring of, 89
 - teams and meetings, 86-87

N

- Negotiation
 - managing violence without coercion, 203-210
- Neurobiology
 - of depression in late life, 130-136
- Neurotransmitters
 - biology in psychiatric nursing, 216-224
- Nurse(s)
 - impact of childhood sexual abuse on psychological well-being and practice of, 137-145
 - improving responses of toward substance-misusing patients, 286-294
 - jack of all trades and master of one, 231-232
- Nurse-client relationship
 - uniqueness within, 34-39
- Nurse-physician collaboration
 - quality, cost-effective psychiatric treatment in practice model, 332-337
- Nursing theory, *see* Theory, nursing

O

- Orientation
 - in research on cognitive impairment in older adults, 26
- Outcome research, psychiatric nursing
 - state of the science, 311-331
 - clinical domains of, 326-327
 - importance of, 311-312
 - methodological strategies for enhancing, 323-325
 - summary of all studies in the last 5 years, 314-322
- Outcome, patient
 - and satisfaction of patients of clinical nurse specialists, 240-250
 - ethical cautions in use of for resource allocation in managed care, 173-178
 - cautions unique to mental illness, 174
 - difficulties in defining a good outcome, 176-177

- philosophical appeal of outcome measurement, 173-178
- problems with outcome measurements, 174-176
- societal obligation to future generations, 177
- suggested guidelines, 176
- Outpatients
 - health-seeking resources in depressed, 179-187

P

- Pain, psychic
 - in self-detection of schizophrenic relapse, 261-268
- Patients
 - clinical outcomes and satisfaction of patients of clinical nurse specialists, 240-250
 - see also* Clients
- Pattern
 - in Rogers' and Peplau's theories of nursing, 43
- Peplau, Hildegard
 - middle-range theory of in conjunction with Roger's grand theory, 40-44
 - theory of interpersonal relations, 42-43
 - in clinical supervision model, 3-10
- Perception
 - in research on cognitive impairment in older adults, 26-27
- Physicians
 - collaborative practice model with clinical nurse specialists, 332-337
- Post traumatic stress disorder
 - evolving concept of, 195-202
 - antecedents, 198
 - attributes, 197
 - consequences, 199
 - future research, 199-200
 - related concepts, 199
- Practice, nursing
 - impact of childhood sexual abuse on nurses', 137-145
- Primary health care
 - South African perspective on educating nurses for psychiatric, 348-353
- Progressively Lowered Stress Threshold model
 - denial in Alzheimer's disease caregivers in research on, 62-67
- Protection and advocacy programs, 233-239
 - client assistance program, 233-234
 - education, 237
 - for assistive technology, 234-235
 - for developmental disabilities, 233
 - for individual rights, 234
 - for mental illness, 234
 - nursing practice, 235
 - research, 237-238
 - rights, respect, dignity, and empowerment, 235-236
 - role of the nurse, 236-237
- Psychobiology, 216-224
- Psychomotor ability
 - in research on cognitive impairment in older adult, s, 27-28
- Psychoneuroimmunology, 216-224

Q

Quality of care

- CNS-MD collaborative practice model for quality, cost-effective psychiatric treatment, 332-337

R

Reflexive coherence

- in clinical supervision model, 3-10

Relapse, of schizophrenia

- development of self-care ability to detect early signs of, 261-268

Relationships

- uniqueness within nurse-client, 34-39

Research, psychiatric nursing

- critical review of research on cognitive impairment in older adults, 22-33
- need for on protection and advocacy, 237-238
- state of the science in outcome research, 311-331
- uncovering and managing denial during research process, 62-67

Residential programs

- transitional for homeless mentally ill clients, 152-157

Resource allocation

- ethical cautions in use of outcomes for in managed care, 173-178

Respect

- in protection and advocacy programs, 235-236

Restrains

- agitation intervention research and, 253

Rights, client's

- in protection and advocacy program, 235-236

Rogers, Martha

- grand theory of in conjunction with Peplau's middle-range theory, 40-44

S

Satisfaction, patient

- and clinical outcomes in patients of clinical nurse specialists, 240-250

Schizophrenia

- chronic sorrow in parents of adult children with chronic, 77-84
- family experience with positive client response to clozapine, 11-21
- self-care ability to detect early signs of relapse, 261-268
- social support and, 68-76
- Self-care ability
 - development of to detect schizophrenic relapse, 261-268

Self-induced water intoxication

- patient perceptions of, 295-304

Self-management

- by people hospitalized with bipolar disorder, 122-129

Self-transcendence

- elders' perceptions of role of group psychotherapy in fostering, 338-347

Sexual abuse, childhood

- impact on psychological well-being and practice of nurses, 137-145

- inquiring about as part of nursing history, 146-151

Social intactness

- in research on cognitive impairment in older adults, 28

Social support

- and schizophrenia, 68-76
 - conceptualizations of, 68-70
 - generalizability, 71
 - operational models, 70-71
 - social network studies, 72-73

Sorrow, chronic

- in parents of chronically mentally ill adult children, 77-84

South Africa

- educating nurses for primary psychiatric care in, 348-353

Staff safety

- improving through an aggression management program, 211-215

Stress

- depression and neurobiologic nature of, 133-135
- in interactional model of suicidal behaviors, 158-168
- post traumatic stress disorder, 195-202

Students, nursing

- symptoms of depression among female, 269-278

Substance misuse/abuse

- improving nurses' responses toward substance-misusing patients, 286-294

Suicide

- interactional model of suicidal behaviors, 158-168
 - nursing interventions, 164-165
 - nursing research, 165-166

Suicide risk

- mental illnesses with, 227-228

Supervision, clinical

- three-way mirror model for, 3-10

System parallel reflection

- in clinical supervision model, 3-10

T

Team meetings, multidisciplinary

- critical reappraisal of in psychiatric care settings, 85-91

Theory, nursing

- Rogers' grand theory in conjunction with Peplau's middle-range theory, 40-44

Transcultural psychiatric nursing

- intergenerational conflict in Cuban and Haitian immigrant families, 354-364

Transitional residential program
for mentally ill homeless clients, 152-157

V

Violence
improving staff safety with aggression management
program, 211-215
managing without coercion, 203-210
Vulnerability
voices of, 61

W

Water intoxication, self-induced
patient perceptions of, 295-304
Well-being, psychological
impact of childhood sexual abuse on nurses', 137-145
Wellness
the last well family, 1-2
Women
symptoms of depression among female nursing students,
269-278
